## EXPERIENCE

---

### TOAST

Jan 2021 - Present

#### Software Engineer I

- Implemented responsive user interface for onboarding & upsells with React
- Designed and implemented new interfaces for improved menu navigation and item modification in Order and Pay at the Table
- Lead project surrounding guest-account UX, modeling the current state, identifying opportunities for improvements, designing new screens, and leading implementation
- Aggregated guest feedback responses at regular intervals and presented findings to product team
- Created metric dashboards with Heap to monitor in-flight experiments

### CUSEUM

Apr - Jun 2020

#### Software Development Intern

- Developed conversational web interface as a prototype for a fully contactless ticketing kiosk in Vue
- Created Flutter proof-of-concept contact-tracing mobile app using Bluetooth Low Energy to detect distances between devices

### TOAST

Jan - Apr 2020

#### Software Engineer Co-op

- Updated UI within the Toast Takeout iOS app to enable delivery features
- Collaborated cross-team as part of COVID-19 expedited response, implementing features such as contactless delivery and curbside pickup
- Created internal React.js web interface for configuring Toast Drop Points
- Added feature to existing Groovy web tool allowing restaurants to manage their digital presence

### CHEWY

Jan - Jun 2019

#### Software Engineer Co-op

- Created Ship Route Manager project [SRM] to reduce manual data entry
- Designed SRM database schema in PostgreSQL and Flyway
- Implemented SRM backend for excel parsing and data validation with Java
- Developed frontend SPA for SRM using Vue.js
- Collaborated with senior UX designer to design wireframes for SRM
